- [Makulu Shift Ubuntu Variant Released](#) [3]

We have just released the much awaited Beta build of Shift ( the Ubuntu Variant ), It is marked as a stable Build that can be used as a daily Runner.

- [First Shift Patch sent out](#) [4]

We have just sent out the First big Patch for the new Makulu shift ( Ubuntu Variant released earlier today ). This patch now completes the Desktop Manager and makes some significant changes. Please keep in Mind that Shift Ubuntu is a build we are now constantly working on and updating, therefore you will notice a lot of changes over a short period of time, so expect many updates. ISO's will also regularly get updated on the Website. You can see the Full video of what's new in the latest patch here :
