- List Open Files On Linux With The Lsof Command - Invidious [2]
  Sometimes processes running on Linux will lock down files and today we're going to look at a program that'll help you identify which programs are doing that and which files are locked, this is lsof

- How to enable Function Keys on a Chromebook [3]
  Today we are looking at how to enable Function Keys on a Chromebook Please follow the video/audio guide as a tutorial where we explain the process step by step and use the commands below.

- How to install the Opera Browser on Elementary OS 6.0 - Invidious [4]
  In this video, we are looking at how to install the Opera Browser on Elementary OS 6.0.

- How To Install Blue Recorder on Ubuntu 20.04 LTS - idroot [5]
  In this tutorial, we will show you how to install Blue Recorder on Ubuntu 20.04 LTS. For those of you who didn't know, Blue Recorder is a simple desktop recorder for Linux systems. It is released under open-source GNU General Public License version 3 and built using Rust,
GTK+ 3, and FFmpeg. You can record video in Mkv, Avi, mp4, WMV, gif, and nut file formats.

This article assumes you have at least basic knowledge of Linux, know how to use the shell, and most importantly, you host your site on your own VPS. The installation is quite simple and assumes you are running in the root account, if not you may need to add `sudo` to the commands to get root privileges. I will show you the step-by-step installation of the Blue Recorder screen recorder on Ubuntu 20.04 (Focal Fossa). You can follow the same instructions for Ubuntu 18.04, 16.04, and any other Debian-based distribution like Linux Mint.
