With version 21.12 just around the corner, we are releasing the first beta version (21.11.80) for testing. Try it out and help find breakages in your daily usage or bugs in these new features...

You may now import your video footage or audio recording folder while automatically ignoring the folder structures created by some devices like Sony XDCam, Panasonic P2, Canon camcorders or Zoom audio recorders. Please report any issues you are facing at https://bugs.kde.org/enter_bug.cgi?product=kdenlive. In the report don’t forget to set 21.11.80 as your version!
