- **Home button fixed in ROX-Filer** [3]
  
  At the top of a ROX-Filer window, there is an icon of a house, mouseover shows "Change to home directory". Clicking that icon changes the window to the /root folder.

- **Mesa now has r600 and radeonsi drivers** [4]
  
  Folder /usr/lib/dri has drivers that provide hardware acceleration for libGL.

- **Package libxres compiled** [5]
  
  I was recently compiling a source package, forget what it was, might have been xfce, it required a dependency 'libxres". OK, it is a small library, might as well include it in the build, so now compiled in OpenEmbedded and added to the EasyOS package-list.
