Google Chrome is the most popular web browser. No matter whether you prefer to use it, Chrome manages to offer a good user experience.

Even though it is available for Linux, it is not an open-source web browser.

And, if you need the look and feel of Google Chrome but want to use an open-source solution, Chromium can be your answer.

But isn't Google Chrome based on Chromium? (that's a Yes.) And, it's also developed by Google? (Also, Yes.)

So, what are the differences between Chrome and Chromium? In this article, we shall take an in-depth look at both of them and compare them while presenting some benchmarks.
