These two are the most dominant distros out there in the market. Roughly there are 290 Linux distro variations out of which 131 are driven out from Debian and 58 directly from the code. Pretty interesting, right? Both have quite a few things in common and Ubuntu is developed based on other testing snapshot releases. Though there are some differences as well.

We have all heard very good things about both of these. However, today I have compared 14 features in this Debian vs Ubuntu 2021 comparison article. T
