- How to install and configure Redis 6 on Debian 11 [2]

  Redis is an in-memory data structure store, used as a distributed, in-memory key?value database, cache and message broker, with optional durability. Redis supports different kinds of abstract data structures, such as strings, lists, maps, sets, sorted sets, HyperLogLogs, bitmaps, streams, and spatial indices.

  In this tutorial we are going to learn how to install Redis 6 on Debian 11.

- Install Gnome on Ubuntu 22.04 | 20.04 LTS Linux [3]

  If you are using minimal server Ubuntu 22.04 Jammy JellyFish or Ubuntu 20.04 LTS Focal Fosaa, then you can install GNOME desktop environment using command line terminal.

  GNOME is the popular Linux desktop environment published under the GNU ? GPL, and LGPL. It is simple, user-friendly, and accessible. The desktop and applications are translated into a variety of languages. The programs are based on the GTK + graphics library.

  With Ubuntu 22.04, GNOME 3 is set as the default desktop environment in standard GUI Dekstop, however, if you have installed minimal CLI version or any other Ubuntu flavor but now want to get default/minimal/vanilla user interface without reinstalling existing Ubuntu Linux again then here is a tutorial.

- How To Install and Use AsciIDoc in Linux System [4]
There are many applications you can use for writing articles, notes, writing slides, making web pages, etc. you can use LaTeX, HTML, XML, AsciiDoc, etc., for these purposes. Each of them has its own pros and cons. Among all of these, AsciiDoc is quite different from all others and has its own unique features. For Linux users, AsciiDoc is also available. AsciiDoc in Linux needs some special attention to learn, and to fulfill that is the goal of this post.

AsciiDoc is lightweight and way handier than other writing applications. You can put your concentration on a single point, i.e., writing content with it. It won’t distract your concentration with redundant features. To learn about AsciiDoc in great detail, stick to this post till the end. Happy learning!
