We have different preferences in using Fedora Linux. For example, there are some people who choose Fedora Linux because Fedora Workstation uses GNOME as its desktop environment by default. But there are also some people who want to use Fedora Linux but want to use a different desktop environment. Or there are also some people who use Fedora Linux with certain needs but don't want to be bothered with system configuration and application installation. Or even some people want to install Fedora Linux freely according to their needs. Therefore Fedora Linux provides several editions according to your needs. This article will introduce the different Fedora Linux editions.
