Google chrome is one of the most popular application in the world of browser. There are two type of browser google provide one is open source [Chromium] another one is closed source [Chrome]. Now, if we talking about open source Linux must be in the list. If you just switched from windows to Linux and thinking how can I transfer my all profiles, settings, bookmarks from windows to Linux then read this blog https://trendoceans.com/migrate-chrome-data-settings-profiles-from-windows-to-linux/ [2]
