About two days from now, depending on your local timezone, 2021 will be over. It's almost December 30th -- 30 minutes away to be precise -- in JST.

2021 was very good to us. We served about 190,000,000 hits, we published about 18,000 nodes, and about half a dozen regular contributors were involved, both behind the scenes and in public. In 2022 we'll turn 18.

Earlier this year we moved our IRC channel from the Freenode network to the Techrights network and days ago we published all the IRC logs. They tell quite the story.
