UbuntuDDE Remix 21.10 Released with Latest Deepin Desktop Environment

By Marius Nestor
Created 03/01/2022 - 5:57pm
Based on the Ubuntu 21.10 (Impish Indri) operating system release, UbuntuDDE Remix 21.10 is powered by the same kernel as upstream, Linux 5.13, and features the latest Deepin Desktop Environment (DDE) and related software packages available at the moment of writing.

In addition, UbuntuDDE Remix 21.10 comes with an updated DDE Store to version 1.2.3 for a better package management experience, the Calamares graphical installer to make the installation of the distribution easier, as well as updated artwork from both the Ubuntu 21.10 and Deepin Linux distributions.
