Still based on the Ubuntu 16.04 LTS (Xenial Xerus) operating system series, the Ubuntu Touch OTA-21 update is here one and a half months after Ubuntu Touch OTA-20 with more improvements and various bug fixes.

Highlights include a redesigned greeter (PIN/password entry screen), a new Tamil font, a new magnetometer and compass plugin for all Halium 9 or later based devices, and the ability to clear the lists of recent or missed calls.
