GNOME 42 alpha is now ready for public testing to give the Linux and Open Source community an early taste of what they can expect from the next major release of one of the most popular desktop environments for Linux-powered operating systems, used on desktop and mobile.

The biggest changes in the GNOME 42 release around the GTK 4 and libadwaita components. Some of the default apps distributed as part of the GNOME stack have been ported to GTK 4 for a more modern look and extra functionality. Here's a first look at some of them.
