LibreOffice Writer: Inserting QR Codes

This tutorial explains how to create and insert Quick Response (QR) codes in Writer, the word processor program of LibreOffice. Why we learn to make QR Codes? Because today, QR Codes are popular thanks to smartphones so people can quickly access address you're point to in your publications like books, registration papers, flyers, posters, etc. This requires Writer 6.4 or later and does not require other program. Now let's do it!
