- DENT 2.0 released [2]

- DENT 2.0, Secure and Scalable Open Source Network Operating System Aimed at Small and Mid-Size Enterprises, Released [4]

The DENT Project, an open source network operating system utilizing the Linux Kernel, Switchdev, and other Linux based projects, today announced DENT 2.0 is available for immediate download. The "Beeblebrox" release adds key features utilized by distributed enterprises in retail and remote facilities, providing a secure and scalable Linux-based Network Operating System (NOS) for disaggregated switches adaptable to edge deployment. DENT provides a smaller, more lightweight NOS for use at the small, remote edges of enterprise networks.

FINOS, the Fintech Open Source Foundation and financial sector arm of the Linux Foundation, and The Linux Foundation, the nonprofit organization enabling mass innovation through open source, today announced its partnership with Fintech Week London. Their annual event, Open Source in Finance Forum (OSFF), will take place in London on 13 July, during Fintech Week London, which will run from 11 ? 14 July.
