IPFire 2.27 - Core Update 164 released

By Roy Schestowitz
Created 10/03/2022 - 8:21pm
A little but later than scheduled, it is finally here: IPFire 2.27 - Core Update 164 - coming with a vastly improved firewall engine, a new kernel under the hood, and of course with various security and bug fixes.

Before we talk in detail about what is new, I would like to ask you for your support. IPFire is a small team of people and like many of our open source friends, we?ve taken a hit this year and would like to ask you to help us out.
