A few days ago on March 6 I participated in the Binary T00ls Summit online event (https://binary-tools.net/) organised by José Marchesi (https://jemarch.net); a video recording is now available.

My presentation had the ridiculous title GNU Jitter and the illusion of simplicity or Copying, patching and combining compiler-generated code in executable memory or The Anarchist?s guide to GCC or The fun of playing with fire ? or, in shortened form, GNU Jitter and GCC: the fun of playing with fire.
