Kick-start your week with four easy (but still cool) tricks on your Linux desktop. Install the media server you've always wanted but never got around to doing, or fine-tune your hardware to squeeze out a few more hours of battery power ... All this and more in this week's How To Roundup.

1 - [Install a media server](#) [2]: All good geeks have access to a spare server. And in most cases that server, whether it is a hosted server, a spare one at work or home or a friend's, is probably underutilised. Put that spare capacity to work with Jinzora and access your media files over the Internet, no matter where you are.

2 - Squeeze out some more battery life:
