Ubuntu breaks xorg-server? again

By *srlinuxx*

So Ubuntu has done it again, they've released an update to xorg-server that breaks Xorg for most people leaving them stranded in the console.

This should have never been released. Especially because they already did this last year. There is no public mention of this any where. They should be getting some public word out to the people with busted systems, and letting everyone else know whats up instead of leaving everyone guessing.
