I've been so happy with Mandriva 2010, and this little oops doesn't ruin it, but it does make me scratch my head.

This is a fresh install of 2010 and the update applet has been working flawlessly until this morning. This morning I got up to a blue icon with a down pointing arrow. This was new. So I clicked it to find this:

Clicking the "more info" bar takes me to the 2009.1 Tour.

I think I'll pass! 🤖
