Since it's almost Easter Sunday, I will be sharing with you several cool virtual Easter eggs hidden inside some of our favorite software applications. Today, we will take a look at some Easter eggs inside OpenOffice.org so get ready to have fun or be amused.

OpenOffice.org Calc has a few hidden games inside. You can try them by opening a new Calc spreadsheet, and then entering some characters into a cell.

To play Space Invaders, enter =GAME("StarWars") into any cell and press the ENTER key. If you have closed the game and you try to play it again, the message "oh no, not again" will appear. You can play again by restarting OpenOffice.org Calc.
