The PCLinuxOS 2010 Gnome theme is dark with black and grey colors throughout the boot menu, login, and desktop screens. I preferred the PCLinuxOS 2010 Gnome release over the KDE and other PCLinuxOS 2010 releases because of it's difference in color. Although all quite different, the other editions did all stuck with the darker blue look. I like blue but 'loved' the darker colors on the Gnome edition.
