OpenOffice.org 3.2.1 (build OOO320m18) was released today.

This is a bugfix release, so no new features implemented and the Feature Documentation from 3.2.0 is still valid. As this is the first release from OpenOffice.org's new sponsor Oracle, we have included a refreshed brand as it was necessary due to the acquisition of Sun Microsystems by Oracle in Januar 2010. Among this there are a few other things implemented. Read all about this on Brand Refresh.

Much more details about this version can be found in the technical Release Notes. Of course there is also an Announcement.
