Submitted by srlinuxx on Friday 11th of February 2005 05:20:19 AM Filed under Microsoft [1] SUSE [2]

Mike Nash claims [3] microsoft is safer than Linux stating "Year-to-date for 2005, Microsoft has fixed 15 vulnerabilities affecting Windows Server 2003. In the same time period, for just this year, Red Hat Enterprise Linux 3 users have had to patch 34 vulnerabilities and SuSE Enterprise Linux 9 users have had to patch over 78 vulnerabilities." Did someone say biased and misleading statistics? Yep, safer [4] huh?

Microsoft SUSE
