Updated both PCLinuxOS KDE full and mini isos to 2010.11 with the latest updates through yesterday. This brings in KDE 4.5.3 on the isos, Firefox 3.6.12, Thunderbird 3.1.6, Digikam 1.6.0 and Pidgin 2.7.7 just to name a few of the updates. This should make it easy for users new to PCLinuxOS as they won't have so many updates to perform to get to current status. These isos should appear on the mirrors shortly.

Happy Thanksgiving everyone.
