Submitted by Texstar on Thursday 2nd of December 2010 08:24:27 PM Filed under [Linux](#) [1]

As of today, the latest release in KDE's 4.5 series is 4.5.4, which adds a bunch of stabilization and translation updates on top of 4.5. PCLinuxOS users in general are encouraged to upgrade to 4.5.4. This update is available through the Synaptic Package manager if you have KDE 4 installed.
