Today is Drupal's 10th birthday. Drupal 1.0.0 was released on January 15, 2001. Now, ten years later, we've just released Drupal 7: our best, most flexible, and most user-friendly version yet. After ten years, we haven't lost any momentum.

It's amazing to look back and see how far we've come. To see how much drupal.org and its associated sites have changed and evolved is exciting. To see that we have an active Drupal Association with a paid staff dedicated to the project is wonderful. Drupal, ten years in, has officially become a phenomenon.

Ten years ago, I had no idea that Drupal would become what it has today or that it would become such a large part of my life. And yet, I'm as passionate about Drupal now as I was then.
