I think my hard drive is going out. It's been a while since I bought one. I used to really like Maxtor, but I think they were bought out. By who? I bought a Western Digital a couple years ago and it didn't last too long. I had a samsung one time that lasted for like 10 years! So, what are your opinions of the best, as in sturdy, dependable, and long lasting, hard drives today?

I really got my eye on [this one](#) [2]. It's a Western Digital, but it has a five year warranty where most others have a 3 or 1 year. There are a lot of good reviews and several bad ones, but they all have good and bad reviews.

What brand do you guys like?

Gonna have to keep it to SATA cause SSD seem quite expensive. 😊
