Not that long ago I briefly covered Glest, a free 3D RTS game where the player controls either the Tech Faction or the Magic Faction and fights using all sorts of units and weapons. After, many of you emailed me and suggested that I write about MegaGlest ? because it?s apparently much better.

And indeed it is.

MegaGlest takes Glest to a whole new level, with updated graphics, new factions, weapons, units and pretty much everything inbetween.

Right now is an excellent time to try it out too, because the project has just released version 3.4.0 of the game which brings a heap of bugfixes and and a tonne of new features. Literally. Just check out this list!
