A DVD ripper software allows you to copying the content of a DVD to a hard disk drive. You transfer video on DVDs to different formats, or make a backup of DVD content, and to convert DVD video for playback on media players, streaming, and mobile phone. A few DVD rippers software can copy protected disks so that you can make discs unrestricted and region-free.

#1: AcidRIP

AcidRip is an automated front end for MPlayer/Mencoder (ripping and encoding DVD tool using mplayer and mencoder) written in Perl, using Gtk2::Perl for a graphical interface. Makes encoding a DVD just one button click! You can install it as follows under Debian / Ubuntu Linux:

```
$ sudo apt-get install acidrip
```
