Submitted by srlinuxx on Sunday 20th of February 2011 03:27:32 AM Filed under [Fluxbox](#) [1] [HowTos](#) [2]

Fluxbox is a great lightweight X window manager based on Blackbox 0.61.1 built using C++. Fluxbox has a simple friendly user-interface quite easy to use for any user, and does not require a high machine performance to use it. Been a long time since last Fluxbox stable release from two years, finally Fluxbox 1.3 has been released today with quite a few new features we will take a look at along with installation methods for Fluxbox 1.3.

## What?s new in FluxBox 1.3

Added support for bidirectional text, #2801836.

Allow to override ?Focus New Windows? via `.fluxbox/apps`

New actions:

- ActivateTab
- ArrangeWindowsVertical

New ?MoveN? and ?ClickN? action support for keys file
