Some of us here really enjoy using GIMP. GIMP Paint Studio (GPS) is a package filled with goodies that improve GIMP's drawing and painting features, especially useful if you own a drawing tablet.

It consists of new brushes and tools that will likely make the digital painter-inclined user comfortable with the program from the moment GIMP is launched. The plugin is actually put together by a digital artist who has an incredible gallery on the download site to further demonstrate what can be achieved with GIMP and GIMP Paint Studio.
