[Ubuntu](#) [3]

In this interview Daniel Bray (Lupine) of the Ubuntu Florida LoCo Team explains how he was able to use Ubuntu instead of Microsoft to complete his college degree. In an era when almost all schools in the United States require that its students use either Microsoft or Mac based technical solutions, Bray finds a way to exercise his freedom of choice and use Free and Open Source software to complete his degree.

Question: What school did you attend? What is your major?

Daniel Bray: UCF. B.S. in Information Systems Technology (December 2008) M.S. in Digital Forensics (in progress)

Question: Did you attend classes online or in a classroom setting? If both what was the ratio? Was having the option to do both important and why?

Daniel Bray: The entire B.S. degree was online, as is the M.S. degree. With my work schedule, a 24/7/365 hospital environment, attending classes online is the only option that fits into my schedule.
