The Acer Aspire one is a a 1Gb, Intel Atom Netbook PC, and while you may think the netbook is dead, having a low powered throw in the bag computer is never a bad thing. However even in these heady days when Microsoft are willing to convince you that Windows 7 will happily run on devices such as this, and then effectively killed the market a customers just couldn't figure out why their £200 netbook ran like a dog there is still hope with the Gnome 3 based Distro..
