There is no denying, there are many tasks in the IT department where a Linux server is the answer, especially considering VMware and the cost of a Windows licence, why pay that much when you could put in a CentOS or Ubuntu Server and do the job for Free.

However, if you are just breaking into Linux, or working with someone who doesn't know Linux that well, then it can be an issue, however you don't have to expose them to the fun of the command line, there is an Open Source tool which makes administering a Linux server about as easy as it gets.
