Linux actually has a number of email clients available, but we still have to give the "best" medal to the feature-filled, extensible Thunderbird.

Features

The Best Email Client for Linux Supports multiple POP and IMAP accounts for all your email addresses

Easy account setup with the account wizard

Powerful, yet simple-to-use search and filtering

Saved searches

Multiple viewing options, including vertical columns

Message threading and conversation views

One-click address book adding

Attachment reminders

Tabbed message viewing

Message archiving, perfect for Gmail users

Built-in junk filtering
