This tutorial shows how to install Ubuntu 11.10 (Oneiric Ocelot) and all the programs needed for the [perfect media server](#) [3] to download all your media and stream it to your PS3. This setup includes Sabnzbd+ (an Open Source Binary Newsreader written in Python), Sickbeard (a PVR for newsgroup users), Couch Potato (an automatic NZB and torrent downloader), Headphones (automatic music downloader for SABnzbd), and Serviio (a free media server).
