The latest release of XBMC my preferred application for viewing my Movie collection on the TV and there has been an updated release just recently. I was urged to give this a whirl as it has an Apple Airplay server built in for streaming video on the TV from the iPad.

I have been running XBMC 10.0 on a Sabayon system for the past few months and it's been running well, however always one for the new and change I wanted to give XBMC 11 a bit of a go. The first stage was to see if the Sabayon repositories had an update, they did however it wasn't to the release version it was to the release candidate 2. This doesn't include the airplay functionality so an alternative was needed.
