The GNOME Project has released GNOME 3.6 today, the new version bringing many enhancements and new features, including a redesigned Message Tray, smarter notifications, improved Activity Overview layout, new design for Files (Nautilus) and a new lock screen. Let's take a look at what's new!

Core / GNOME Shell changes

With the latest GNOME 3.6, the Message Tray and the notifications have received some major changes:

* The Message Tray items are bigger, the hot corner has been replaced with the whole bottom screen edge; also, the Message Tray can now be accessed via a keyboard shortcut (Super + M)
