Who wouldn't want to be a Linux kernel developer? Kernel developers work at the heart of the Linux operating system and contribute and work on code that runs the world's technology infrastructure.

The work is so rewarding it attracts contributions from thousands of developers each year who make up the thriving community.

But as Linus Torvalds himself reminded us during the Linux Kernel Panel discussion at LinuxCon this summer, being a kernel developer is not the only way to be an important part of the Linux and open source communities. In fact, developers can often have a large impact on a project with 10 or 15 developers.
