KDE Gets a Homerun

By *srlinuxx*

Created *15/11/2012 - 6:46pm*

Submitted by srlinuxx on Thursday 15th of November 2012 06:46:29 PM Filed under [KDE](#) [1]

An interesting post appeared today in the Planet KDE news feeds. Introducing Homerun almost gave me a mild coronary until I realized it was an add-on. Homerun gives KDE that GNOME 3-like application launcher.

"Homerun is a fullscreen launcher with content organized in tabs. A tab is composed of several "sources". A source can provide one or more sections to a tab. Homerun comes with a few built-in sources, but custom sources can be written using libhomerun."
