Cinnarch is a new project coupling Linux Mint's Cinnamon desktop with the popular Arch Linux. Like Arch, it's technically a rolling release distribution, but with periodic snapshot releases. A new update, considered "in beta stage" by founder Alex Filgueira, was just released and it sounded ripe for a test drive.

Cinnarch is an installable live system for i686 or x86_64 and offers your choice of several languages upon boot. The first step is a selection dialog asking if you'd like to run as a live system or install Cinnarch. The installer is a console menu-based installer, but developers are working on a graphical version.
