The wait for Pardus Anka has been long...and my expectations are high, especially when I saw Pardus Tubitak without PiSi.

At least, seeing the comeback of Elive has made the wait a lot more interesting. I tried the second Alpha and all I have to say is that it is the best alpha I've ever seen in my life.

And Mandriva, or OpenMandriva, or MoonDrake (or any other name that they end up calling it) is also in my list of awaited releases. Yes, I know many people think that the Mandriva ship has sunk. The fact is, OpenMandriva.org is buzzing with mail list activity underneath the Web site posts.
