KDE Plasma Active developer Aaron Seigo has been working to bring a tablet running open source Linux-based software to market for over a year. While the project has hit some roadbumps, Seigo says factory tooling for a new tablet has begun, and the first models could roll off the production line by May.

While Seigo isn't ready to provide specs for the new tablet yet, he says the Vivaldi tablet that's currently in the works has a higher-resolution screen and faster processor than the model the team had planned to release in 2012.
