Microsoft should use a Linux base for an OS. Right, now I've got the awful part of saying it out the way I'll go into detail about how and why I think this would be such a good idea. For everyone. Yes, including Microsoft.

OK, here goes. I'm not going to go into the ideals and fundamentals of open-source, freedom, free software and all the stuff that Linux represents, that's everywhere else, and I really don't have time. For this post I'm only interested in the ideals. Henceforth I present my case m'lud.
