With virtually countless Linux distributions available for every taste and purpose, it's no secret that choice is a defining feature of the Linux world. What's not always apparent, though, is that the range of choices actually gets bigger every year.

New distros come onto the scene on a fairly regular basis; SolusOS and Fuduntu Linux are two I've covered over the past few months, but recently another one caught my eye as being particularly worth covering.

It's Manjaro Linux, a brand-new contender that launched last August and has already sprinted up DistroWatch's page-hit rankings to No. 15. Why all the interest? The project has released a few key updates this month. Here's a rundown of some of the distro's best features.
