CHIP DESIGNER ARM has said that vendors are looking to standardise on both one chip architecture and a single operating system such as Linux across their product lines.

With many of ARM's licensees preparing to make a big splash in the server market, the firm claimed its architecture is the only one that scales from smartphones all the way up to servers. Lakshmi Mandyam, ARM director of Server Systems and Ecosystems told The INQUIRER that the ability to stick with one chip vendor and run the same operating system throughout its product stack is something "people find very interesting".
