Waste your time the right way ? shoot bubbles at similarly colored bubbles, in the hope of freeing the entire board of bubbles just long enough for more bubbles to show up. It?s called Frozen Bubble, and it?s more than a game.

Actually, it?s not more than a game. It?s a game, and for a long time it was one of the best put together games for Linux. That?s not been true for a while ? the platform has grown leaps and bounds for gamers since then ? there?s the Humble Indie Bundle and Steam for Linux, to name a few developments.

But before all of that, Frozen Bubble taught us all that Linux games didn?t need to be ugly. It won Linux Journal?s reader?s choice award seven times, so clearly Linux users love it. The game hasn?t aged perfectly, but it still runs well and the music simply couldn?t be catchier. It?s a worthy diversion.
