As we do every summer, we've pulled together our list of 101 of the "funnest" open source apps ever created. Of course, most of these are games, but there are also a few fun non-games at the end of the list.

Arcade Games

1. Bombermaan

This is a remake of the classic Bomberman game where you blast your way out of a puzzle using bombs and other tools. Up to five players can play at the same time on the same system, or you can play against the computer. Operating System: Windows, Linux.

2. BZFlag

Short for "Battle Zone Capture the Flag," BZFlag is a multiplayer, online 3D tank game. More than 300 people run online servers, so it's usually pretty easy to find a game to join. Operating System: Windows, Linux, OS X.
