Music streaming services have fundamentally altered the way that people access music. Sales of CDs have been steadily falling year on year although they continue to remain the dominant format for music purchases. Digital music sales have also been decreasing. These falls have come at the same time as a profound surge in popularity of music streaming services. Competition in this field is fierce, with music providers such as Spotify, Google Play Music All Access, XBox Music, Rdio, and Pandora all offering a convenient way to access a huge library of music without having to store physical discs or wait for music to synchronise with devices.
